

Your public sector partner for technology
Colorado SIPA makes tech simple

November 15, 2021

Dear Partner,

Thank you for providing input on the RFI SIPA released in September. Your input is invaluable, and we have taken great care in analyzing the responses and incorporating them into our Invitation to Negotiate (ITN). We anticipate a January 2022 ITN release date.

Many of the organizations that provided feedback to the RFI indicated that they would submit a proposal for one, or two of the services that were described in the RFI but not all services. SIPA has a strong preference for awarding a single contract to one or a group of Offerors, with one serving as the prime, to provide all of the services outlined in the RFI, which will be included in the ITN.

If your organization is planning on submitting a proposal for one or more components of the work called for in the ITN, we strongly encourage you to examine partnership opportunities now, prior to the ITN being published.

We are grateful for your interest in Colorado SIPA and thank you for helping us take the steps necessary to develop the best Portal for the residents of Colorado.
